Introduction

This project aims to provide a web service that finds perfect mate for the user's companion dog. With this service, users can enroll their companion animals' profile and set preference information for their mate.

With Vaseline you can...

- Post information of your companion animal
 - age, breed, personality...
- Set preference of the mate
 - age, breed, personality...
- Search perfect mate by distance, preference, and appearance
- Send Like, Proposal, and Message to another user of preferred mate

User Interface

Future Works

- More precise search algorithm for finding mates with closer personality
